Subject: Solid Waste Assessment Test, Hunters Point Naval Shipyard -
Waste Disposal Areas

Dear Commander Guild:

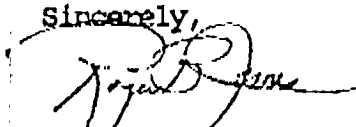

Section 13273 of the California Water Code (added by Chapter 1532 of the Statutes of 1984, AB 3525, Calderon) established the Solid Waste Assessment Test Program. A SWAT report which reliably indicates whether there is any leakage of hazardous waste from the disposal site must be prepared for all facilities ranked under the SWAT program. The State Water Resources Control Board in December 1987 adopted a revised statewide ranking of sites required to perform this study. The Hunters Point Naval Shipyard has been listed on the third rank; therefore, you are required to submit this study by July 1, 1989. The waste disposal sites for which a SWAT report is required are, (1) the Industrial Landfill, (2) the Burning Disposal Site, (3) the Bay Fill Site, and, (4) disposal trench located near the corner of 6th Avenue and J Street, designated as Site 4 under the investigation by the San Francisco District Attorney and California Department of Health Services.

Attached is a draft revised guidance document for the solid waste assessment test which was prepared by the State Board. It summarizes the amended sections of the Water Code and describes a process whereby you should submit a proposal for the assessment to us for review prior to performing the work. The guidance document provides an outline of both the proposal and the final report.

Please be advised that the assessment period is July 1, 1988 through June 30, 1989. I request, pursuant to Section 13267 of the California Water Code, that you submit your study plan not later than June 15, 1988. Regional Board staff is prepared to meet with you to discuss any aspects of the SWAT requirement.

If you have any questions, please contact Kathryn Hart at (415)464-0990, or Bill Hurley at (415)464-0841.

Sincerely,

Roger B. James
Executive Officer
